

TOWER WIRING FOR WIND ENERGY

THE WIND ENERGY MARKET in the United States is on a fast-paced growth curve characterized by evolving technologies, a global supply base and rigorous schedule constraints. Safety, quality and performance requirements all converge at critical project points to heighten already-difficult demands placed on tower wiring providers. At these critical project junctures, it only makes sense to bring in the best—Kelley Electric.

**SAFE / ON-TIME / RELIABLE / ON-BUDGET
QUALITY YOU CAN TRUST**

KELLEY ELECTRIC entered the tower wiring market with one purpose in mind: to provide the safest, most efficient and most reliable team of experts in the wind energy market. Our professionals all start with a solid electrical background; then go through comprehensive training on safety, climbing, rescue techniques and emergency response. The result is a team of professionals that developers can count on to finish projects safely, efficiently and on-time.

KELLEY ELECTRIC crews are trained and certified to OSHA standards and are required to successfully complete courses on Safety and Environmental Health Training, as published by the American Society of Mechanical Engineers and by the American Society of Safety.

**TOWER TO GRID CONNECTIVITY AS FAST, AS RELIABLE
AND AS SAFE AS POSSIBLE**

TOWER WIRING FOR WIND ENERGY

When a developer, manufacturer or general contractor gets a team from Kelley Electric, they get more than a group of electricians and ground workers collected randomly.

They get:

- Experienced tower wiring professionals
- A team knowledgeable in all major turbine manufacturer instructions
- Authorities on the latest evolving practices and equipment designs
- Experts trained to adhere to the toughest OSHA standards for general construction
- Project management expertise
- A rigid pre-flight construction approach
- A team that knows how to work together safely, efficiently, reliably

Kelley Electric is part of The Townsend Corporation, a privately-held company providing critical infrastructure services to the energy industry for over 60 years. The Townsend Corporation has participated in the construction of over 1500 MW of wind energy projects since 2006. The Townsend Corporation is located in Parker City, Indiana.

WHEN ONLY THE BEST WILL DO.
