

TOWNSEND

TOWNSEND TREE SERVICE HERBICIDE APPLICATION

- Townsend is the leader in Integrated Vegetation Management (IVM) solutions, to including full-service herbicide applications for utility and industrial locations.
- An extensive staff of licensed applicators is supported by a comprehensive fleet of innovative equipment and a vertically integrated organization in full collaboration with the industry's leading chemical companies and research universities.
- With the use of modern IVM techniques and advanced herbicides that target invasive species, Townsend provides the best in habitat management. With our research partners, Townsend helps redefine right of way stewardship, producing benefits such as:
 - Improved motorist safety
 - Better service crew access
 - Lower maintenance costs
 - Improved drainage
 - Enhanced aesthetics
- Comprehensive growth and weed control programs Include:
 - Site specific herbicide mixtures
 - Licensed professional applicators
 - Radar-controlled, pressure regulated computerized injection spray systems
 - Multi--year programs with guaranteed results
 - Turn key operations with GPS mapping
- Type of Applications:
